Claims 33, 35-38: The prior art of record does not disclose or suggest a method of inspecting a container bearing surface comprising the steps of causing said light sensor to record the position at which the reflected light in a previous step strikes the light sensor and analyzing from said position data recorded the departure of the bearing surface from a plane perpendicular to said axis in combination with the remaining limitations of the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
